Investing Step-by-Step

Remember:

Screening is only the first step and should <u>not</u> be considered as "buy" recommendation

Using screeners assumes the investor is prepared to <u>spend time</u> following the steps outlined above

Stock Screeners: Key Characteristics

- Quantitative data: Company balance sheet, income statement, earnings etc.
- Updated on regular basis (week, monthly yearly)
- Many come with pre-defined screens such as:
 - Martin Zwieg
 - Graham
 - O'Shaughnessy
 - Buffet
 - Many others
- Screens and be customized

Stock Screeners

- AAII Stock Investor Professional (SI-Pro) (\$21.00/month)
- AOL Money and Finance (free)
- Marketwatch (Free)
- Morningstar (Free or \$15.95/month)
- MSN Money (Free)
- SmartMoney.com (\$15.95/month)
- Validea (\$29.95/month)
- Yahoo Finance (Free or \$13.95/month)
- Zacks Investment Research (Free or \$24.95)
- Most major brokerage houses offer screeners

Note: Jack Hough's favorite screeners highlighted in green

SI-Pro can help

- Screen stocks based upon their financial qualities
- Display and analyze screening results
 - Use organized program displays to study how a company stacks up to its competition and the market
 - Print standard or custom reports for a single company or a group of companies
 - Export data to spreadsheet or text file for additional study
 - NAIC SSG data files for analysis within BetterInvesting's Stock Investor's Toolkit program
- Learn about screening strategies and analysis through pre-programmed screens and articles
- Create tracking lists (portfolios) for further study

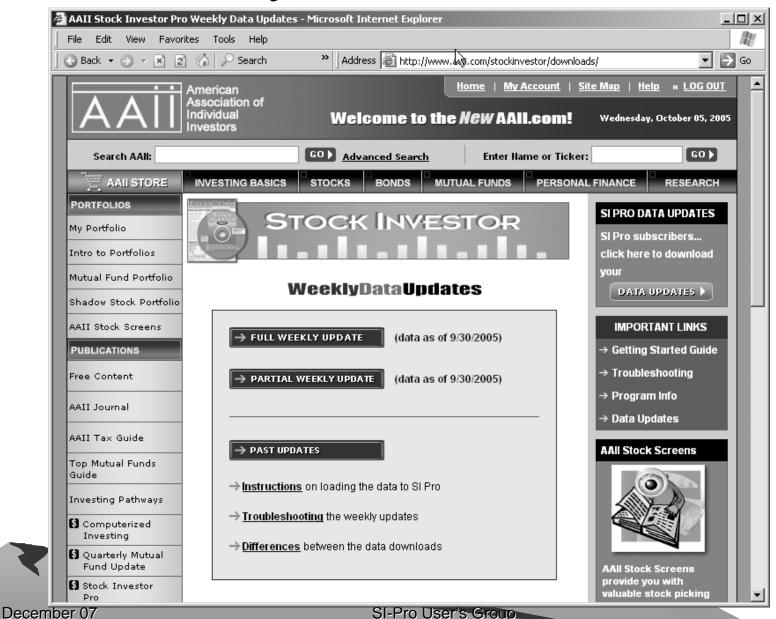

SI-Pro

- Powerful fundamental screening system providing detail company and industry data
 - 50+ preinstalled screening strategies
 - Ability to create your own screens
- Covers 8,900 companies
 - NYSE (2,148), Amex (597), NASDAQ National and SmallCap markets (3,123), and NASDAQ Bulletin Board stocks (2,733)
 - ADRs (520), REITs (255), Closed-end funds (193)
- Detailed sector (12) and industry (100) data
- Fundamental data supplied by Reuters and earnings estimates supplied by I/B/E/S (Institutional Brokers Estimate System)

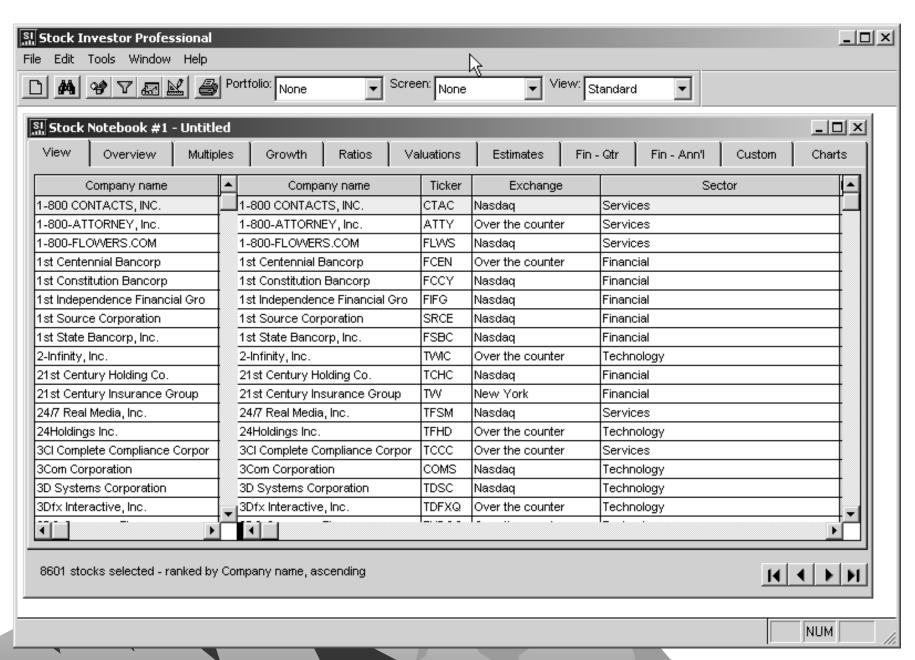

Features	Stock Investor Pro		
Pricing for annual Subscription	\$198 (\$247 non-members)		
Platform	Window s		
Update interval	monthly (CD), w eekly (Web)		
Pre-defined screening filters	56		
Create personalized screens	yes, using any data field		
Company coverage	8,600 stocks		
Industry data	12 broad sectors and 100		
	industries		
Depth of company data	2,200+ per company		
Company Financials	7 years of detailed income and		
	cash flow statements and balance		
	sheets		
Earnings Estimates	quarterly, annual, and long-term		
	grow th estimates along w ith		
	recent surprise data		
Price data	10 years of monthly h/l/c/v data		
Charts & Graphs	6 charts		
Stock ticker tracking	unlimited		
Exporting data	yes, in 6 formats including Excel		
Create custom fields	yes, 250 fields		
Reports	7 standard plus custom reports		
NAIC SSG Data files	yes, for all stocks

Weekly Data Downloads

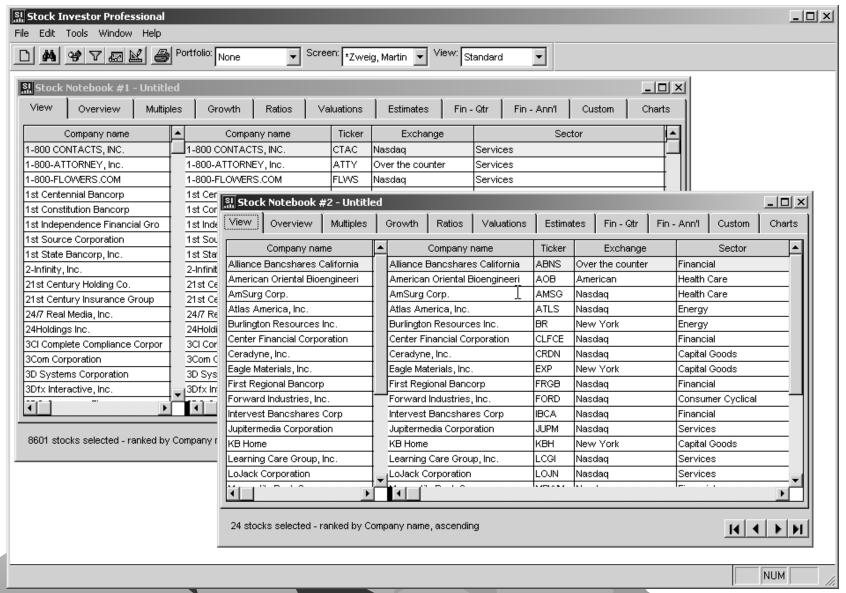

Navigating SI-Pro

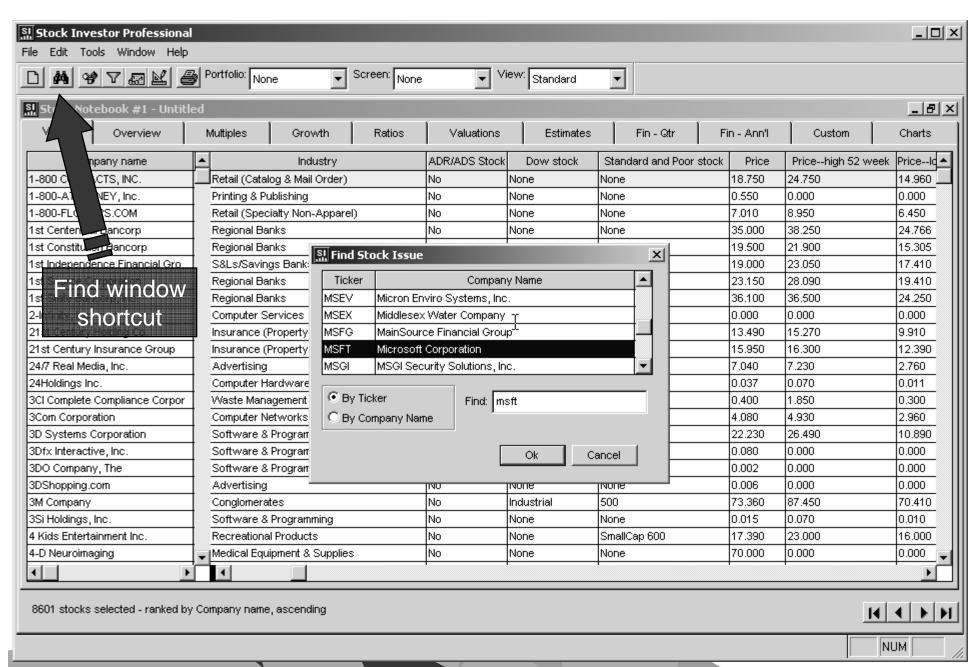

The Stock Notebook

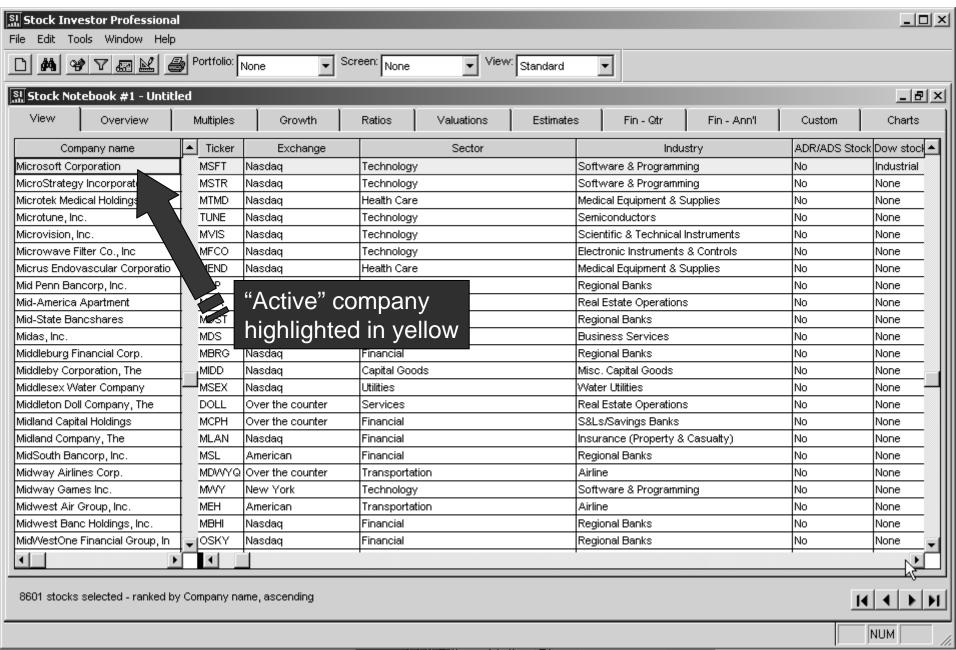

- Automatically opens with the program
 - Stock Notebook #1—Untitled
- Consists of 11 tabs
 - Each displays a related group of data
 - The View tab is the default tab
- Information about the notebook is displayed within the toolbar and lower portion of the notebook
- Multiple notebooks can be open at once

Multiple notebooks can be open at once

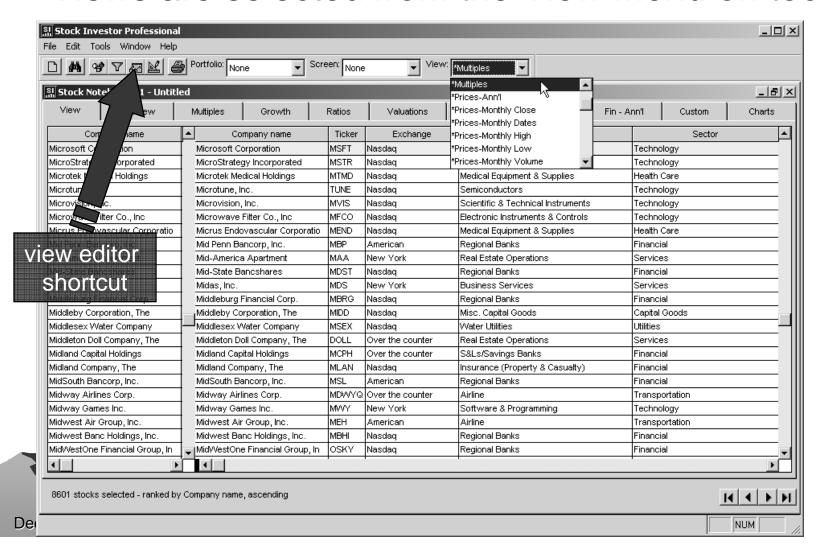

Selecting a Company

Views Are Displayed Within Notebook

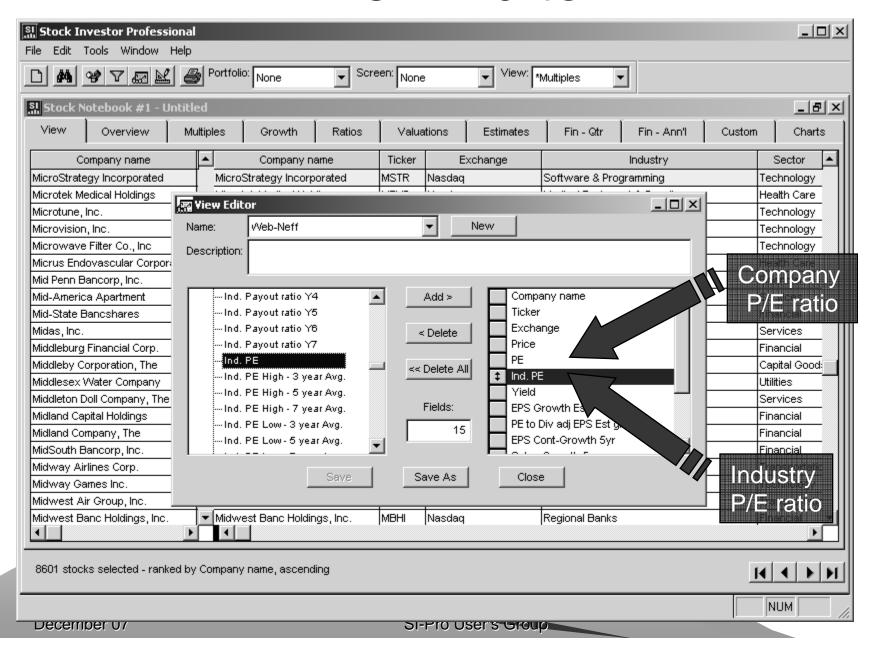

- Program starts up with "Standard" view
- Views are selected from the View menu on toolbar

View Editor

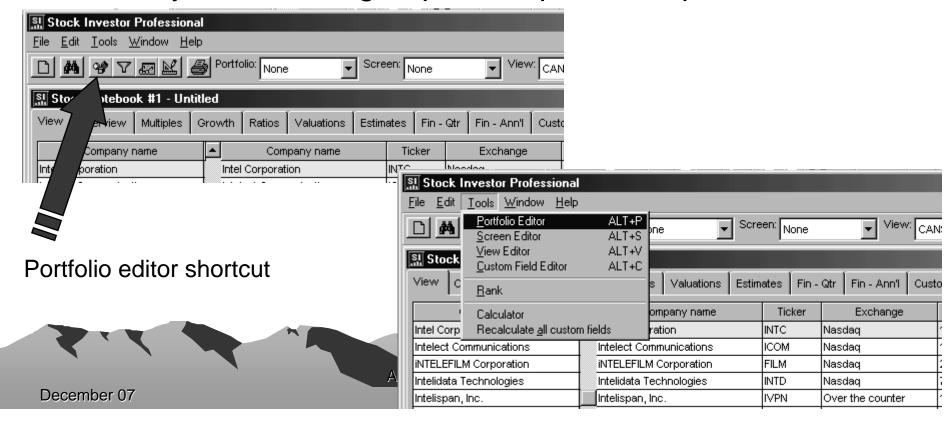

- Views contain company and industry data
- Standard field picker on the left side of the window
- Running count of fields is kept in lower box
- Fields are added by double-clicking or selecting field and clicking on Add >
- Double-clicking a field group will add all elements to the view
- Duplicate entries are not allowed
- Order can be changed by dragging the box in front of field name

View Editor

Portfolios

- A portfolio allows you to create a select group of securities and give it a name
 - Stocks that you own, a hypothetical portfolio, or securities that have passed a screen you created
 - Allows you to follow group from update to update

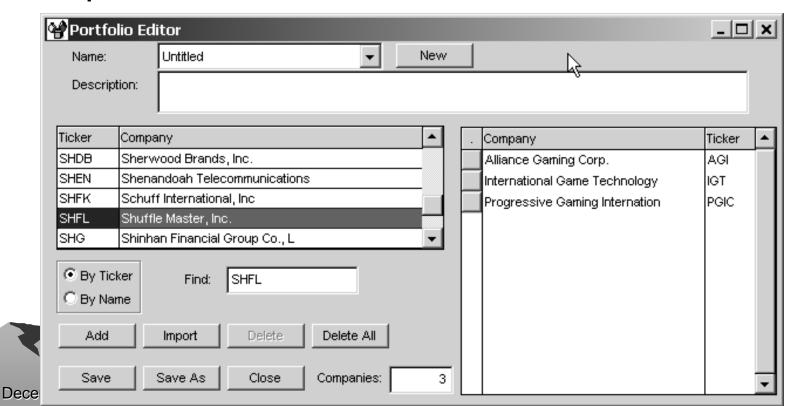

Portfolios continued

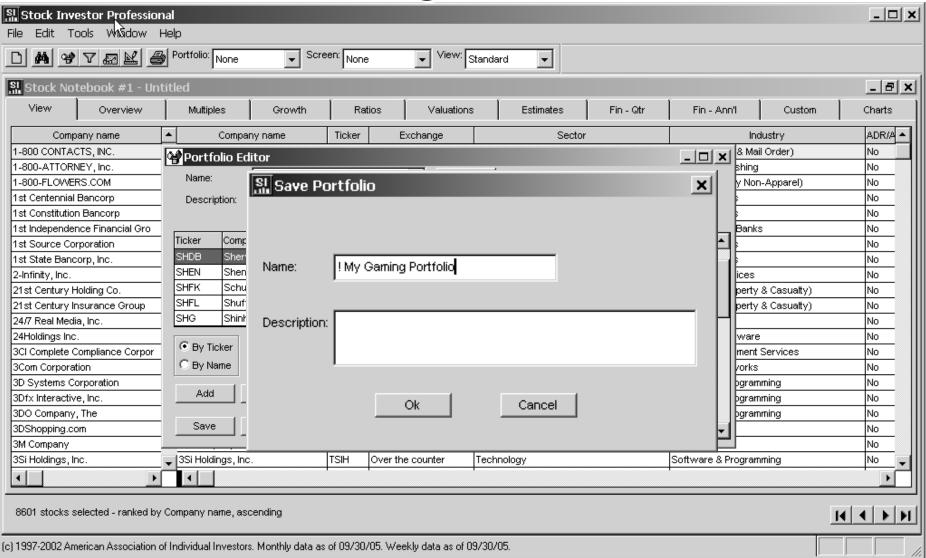

- Portfolio creation
 - Manually using Portfolio Editor
 - Import from text file
 - Save the results of a screen as a portfolio
- A screen can be executed against a portfolio
- Reports can be run on these specific securities

Portfolio Editor

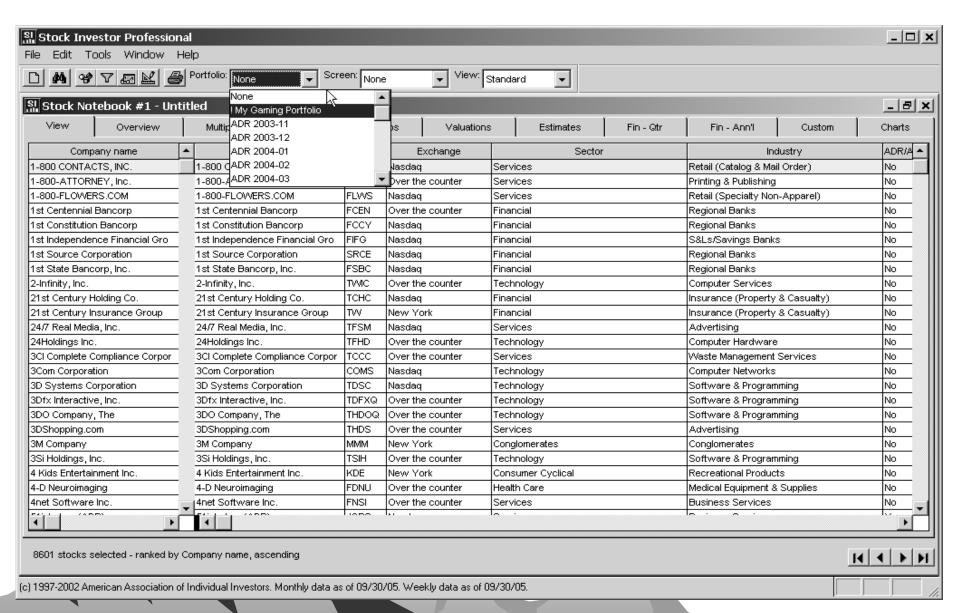

- Enter by hand using company ticker or name
- Running count is kept within portfolio
- List is sorted by name
- Duplicate entries are not allowed

Saving Portfolio

Portfolios Are Loaded From Toolbar

Screening Strategies

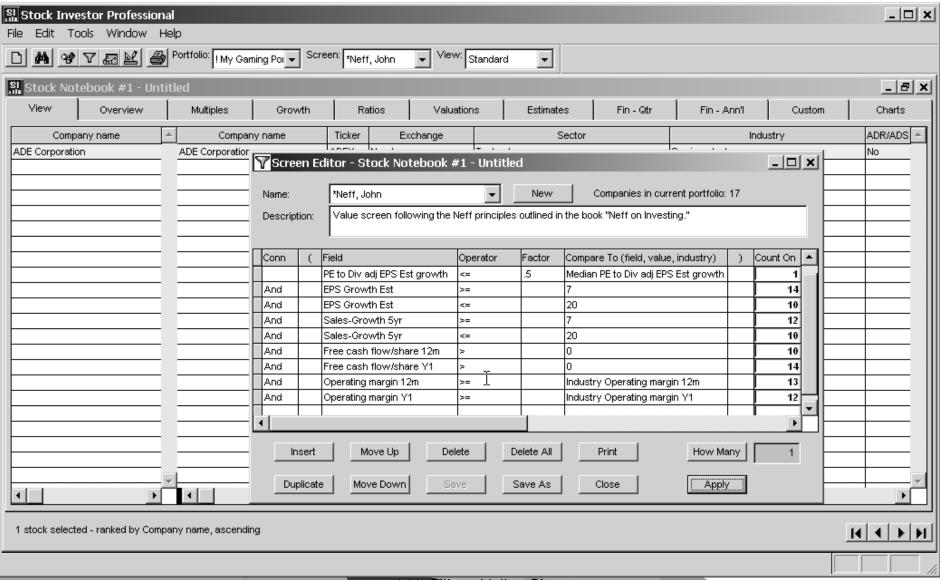

Building a Screening Strategy

- Variables, Relationships, and values
 - For example: Market cap > 150 (O'Shaughnessy Growth Screen)
- Comparative relationships
 - EPS (Y1) > EPS (Y2) (O'Shaughnessy Growth Screen)
- Formula Builder i.e. add (+), subtract (-), multiply (*), divide (/)
 - Sustainable growth = (ROE 12m)*(1-(payout ratio 12m))/100 (custom formula)
 - Sustainable growth >= 15
- The order of the relationships or formulas is important:
 - Start with the basic criteria...i.e. minimum capitalizations or minimum sales
 - Next: insert key criteria such as "Free cash flow/share (12m) > 0" and "Sales-growth 5yr >= 7" etc.
 - End with criteria that may help narrow screening but not mandatory: % Rank-Rel Strength 52-week >= 65 (O'Shaughnessy Growth Screen)

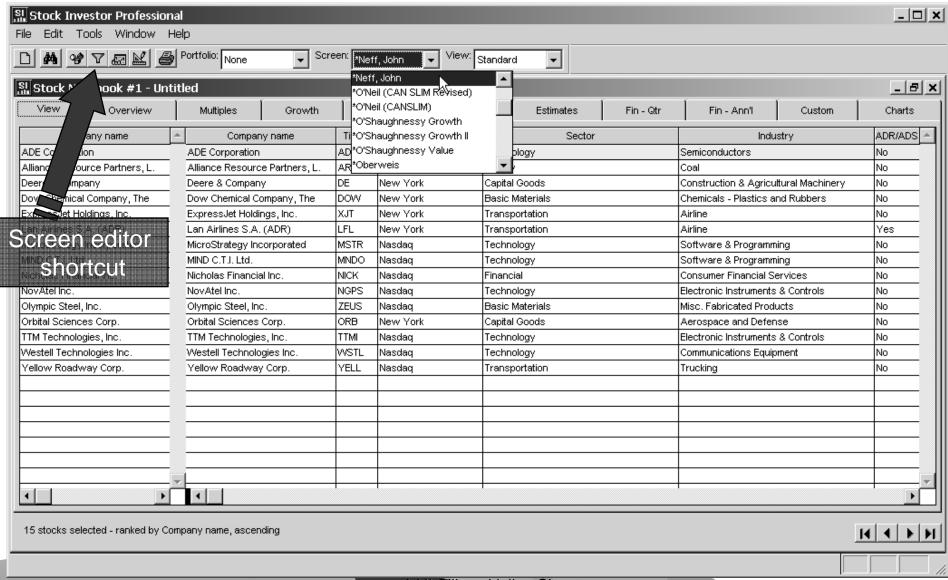

Screening

- You can either select a screen from the pull-down menu on the toolbar or through the Screen Editor
- By selecting a Screen from the toolbar, it runs and loads the passing companies automatically
- The Screen Editor allows you to edit screens, run them, and see how many companies pass each individual criteria

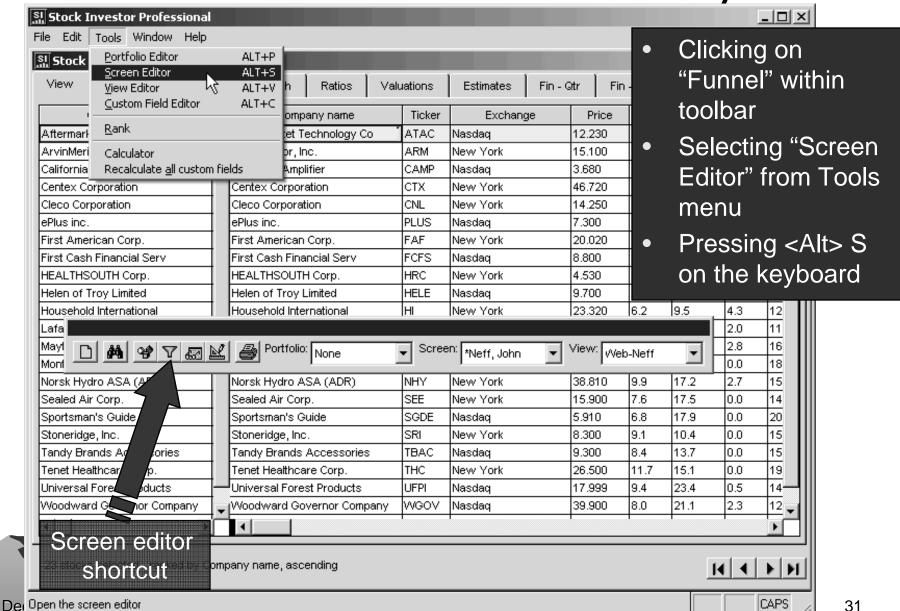

Use Screens to Filter Portfolios

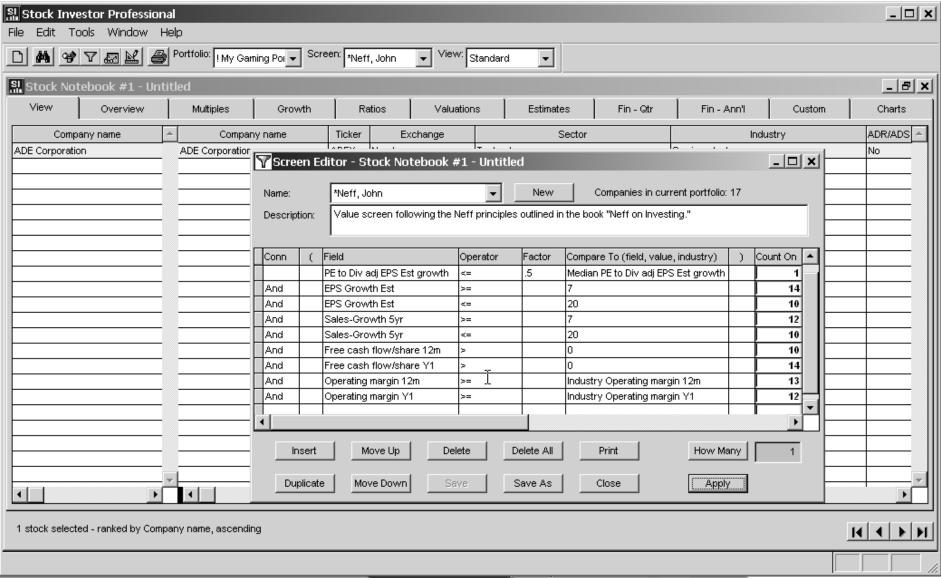

Screen Pull-Down Menu

Screen Editor Activated By:

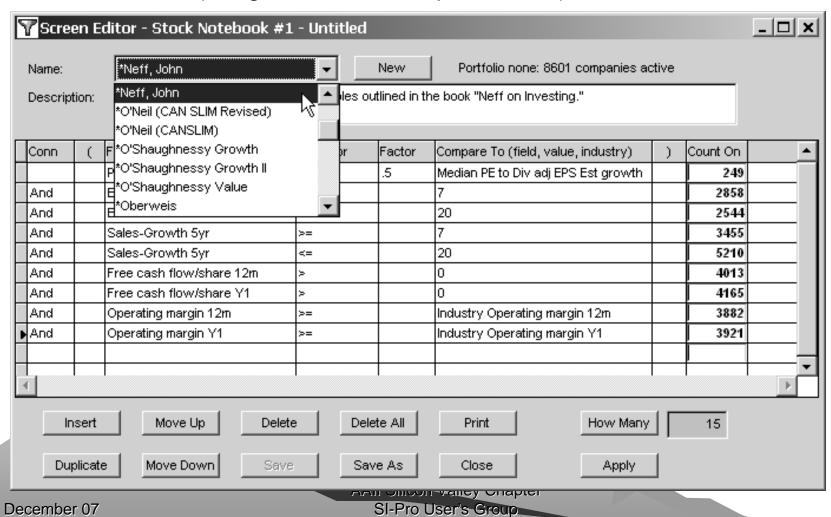

Screens Are Run Against Portfolios

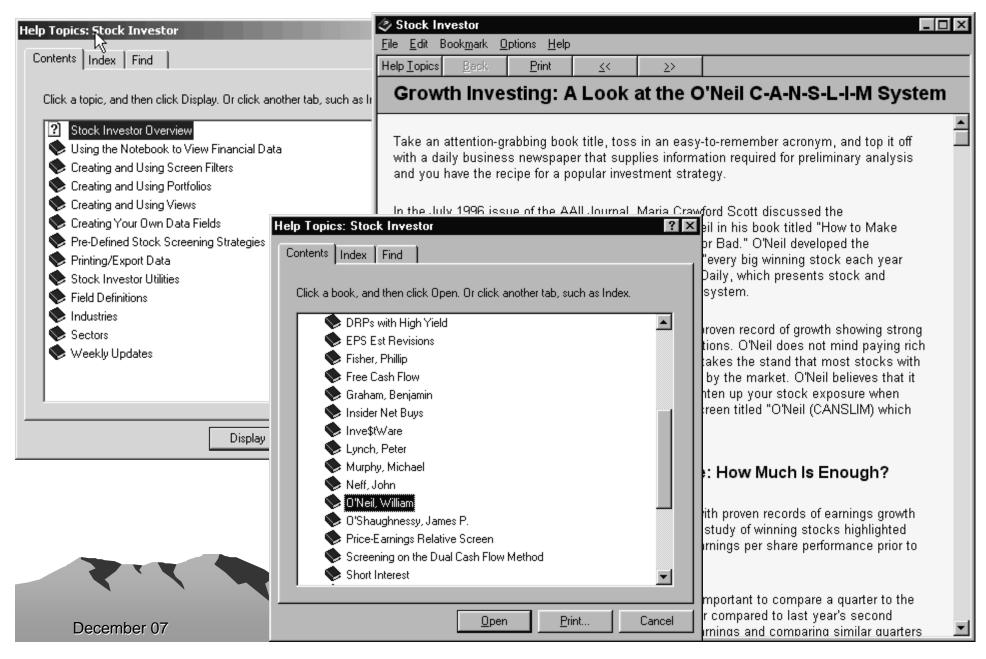

Saved Screen Selection Selected from drop-down menu

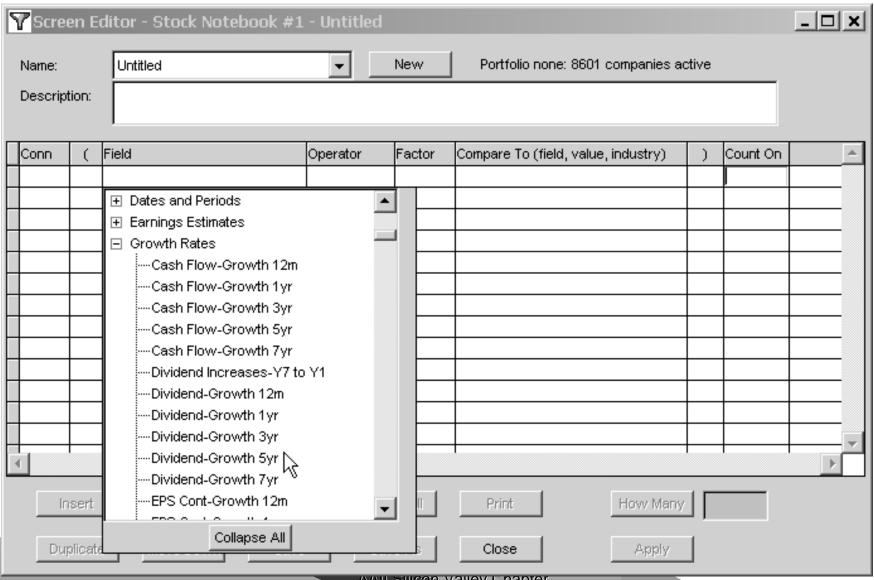

- Over 50 preinstalled (predefined) screens identified with asterisk (*) in front of name (brings them to the top of the list)

Stock Notebook Tabs

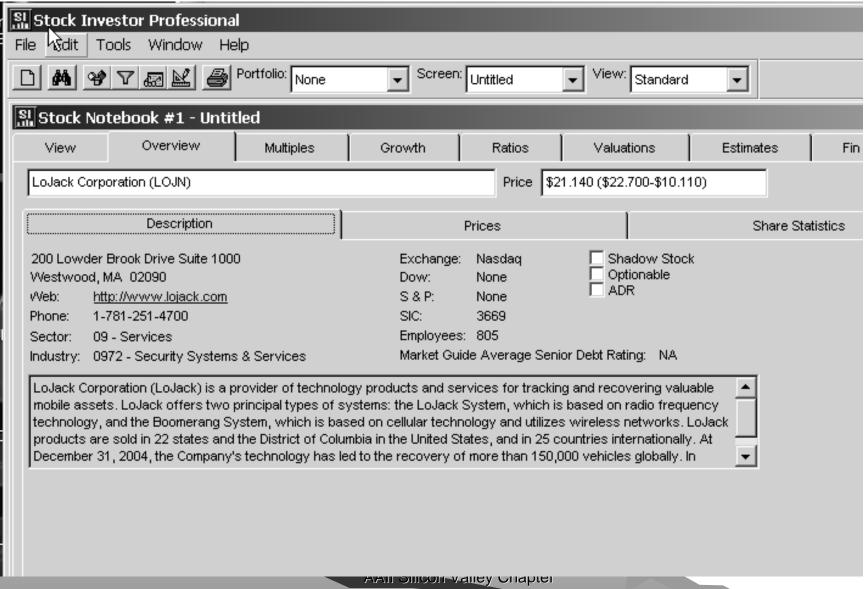

"If we take a late retirement and an early death, we'll just squeak by."

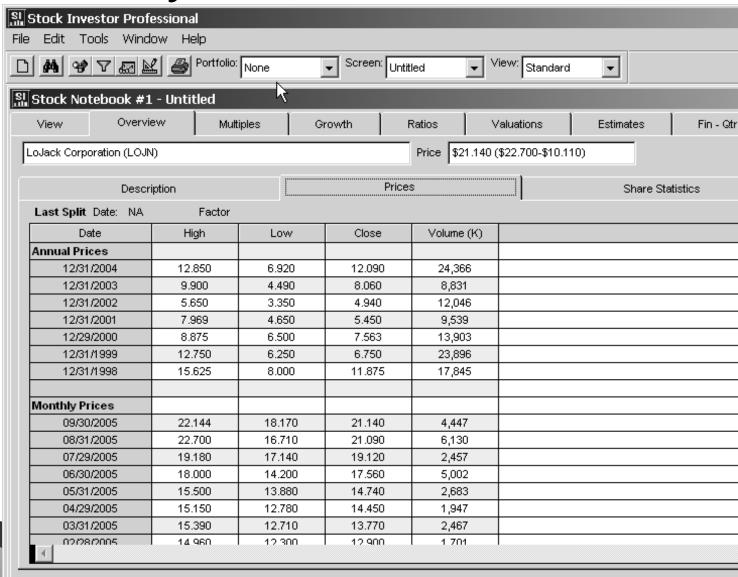

Overview Tab

- Consists of 4 sub-tabs
 - Description
 - Prices
 - Share Statistics
 - DRPs
- An introduction to the company, what it does, an idea of how it has been performing, and investment information

Company Description

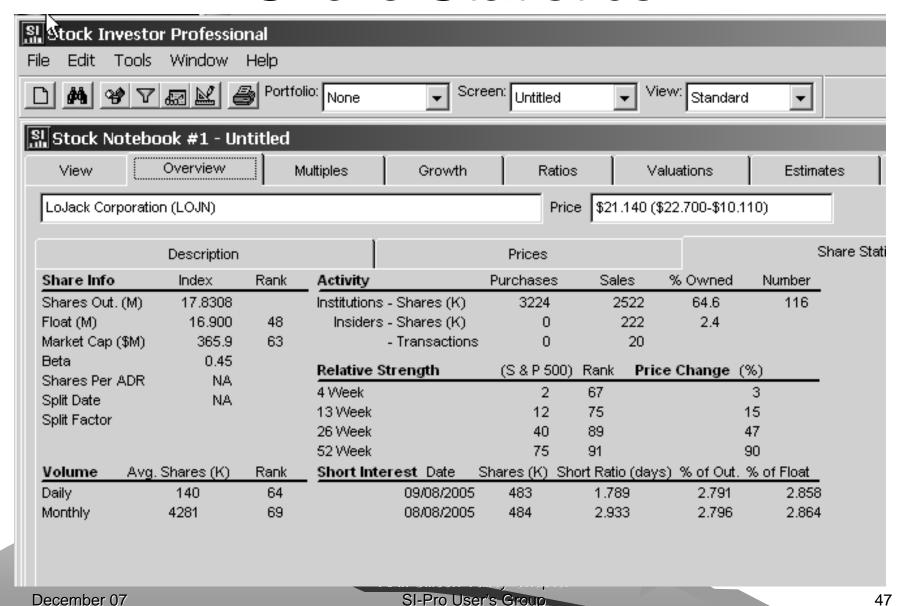

Monthly and Annual Price Data

December 07

SI-Pro User's Group

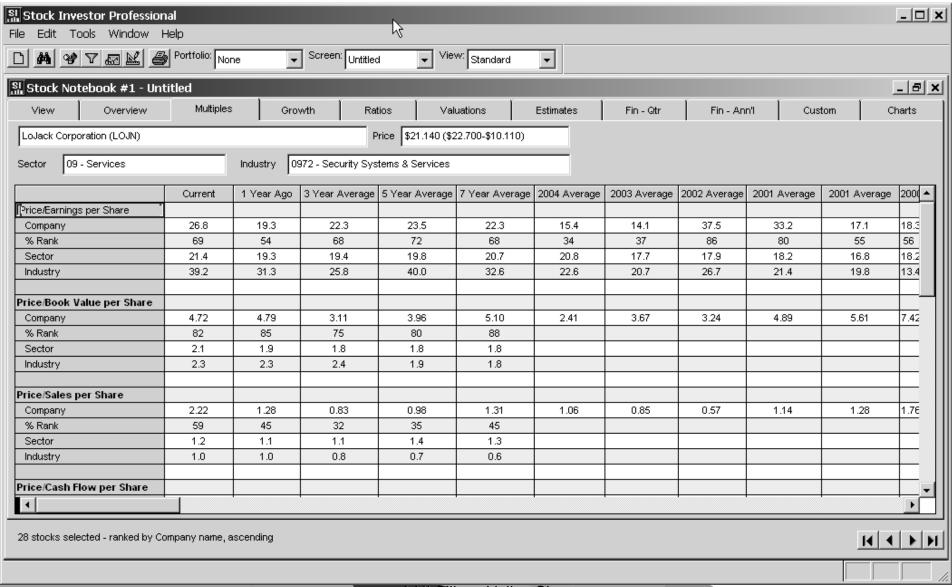

Share Statistics

Multiples Tab

- Collection of financial multiples
 - Yearly averages for each of the last 7 years
 - Historical perspective of the company's valuation level
 - Price/earnings ratios based upon estimates for the current year and the next 2 years
- Able to see how company ranks against companies in its Industry and Sector as well as in the overall Universe

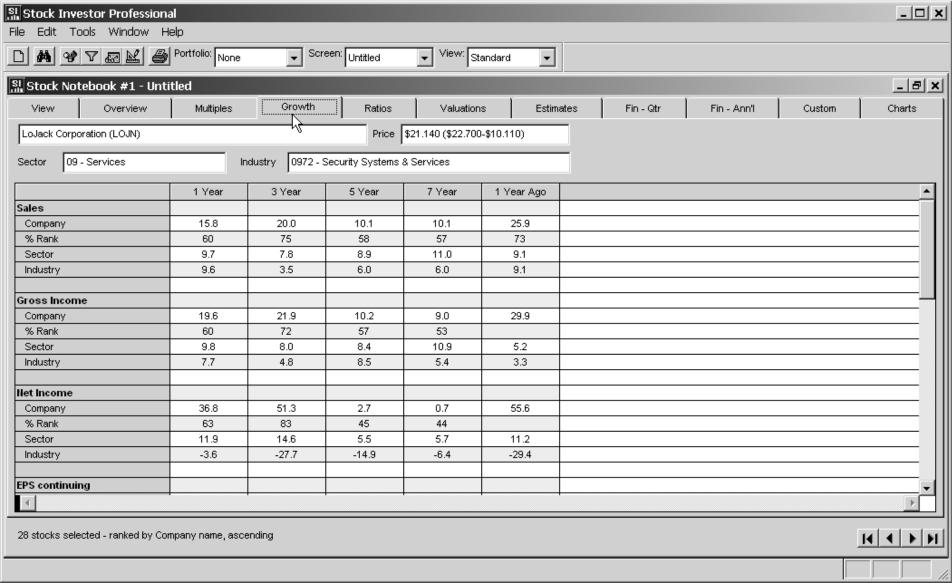

Multiples

Growth Rates Tab

- Growth rates for selected Income Statement and Statement of Cash Flow items
- 1-, 3-, 5-, and 7-year growth rates as well as growth rate 1 year ago
- Able to see whether growth rates are slowing or increasing
- Universe, Sector and Industry comparisons

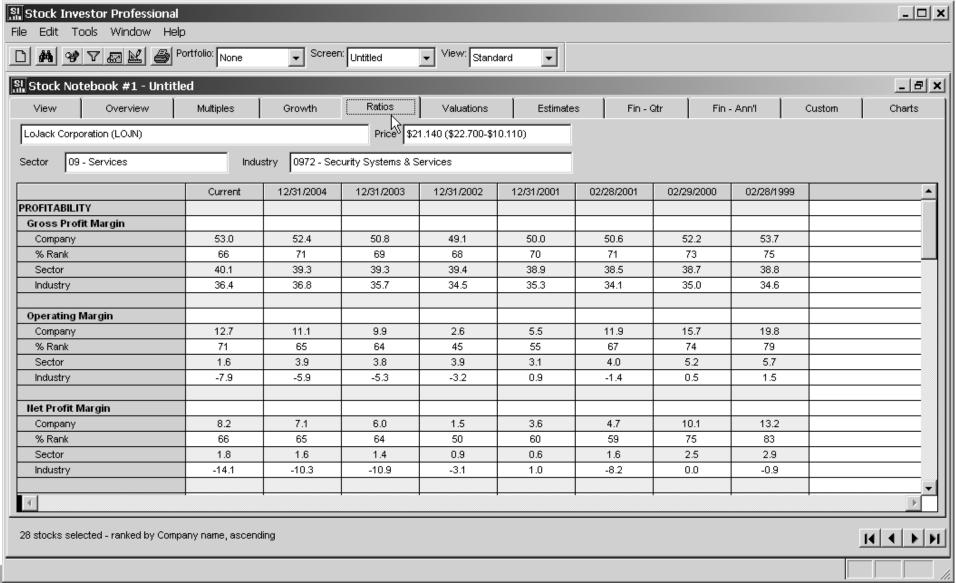

Growth Rates

Ratios Tab

- Profitability, Liquidity, Debt Management, and Asset Management ratios
- Current (last 12 months) and each of the last 7 years
- Universe, Sector and Industry comparisons
 - Many ratios are industry specific

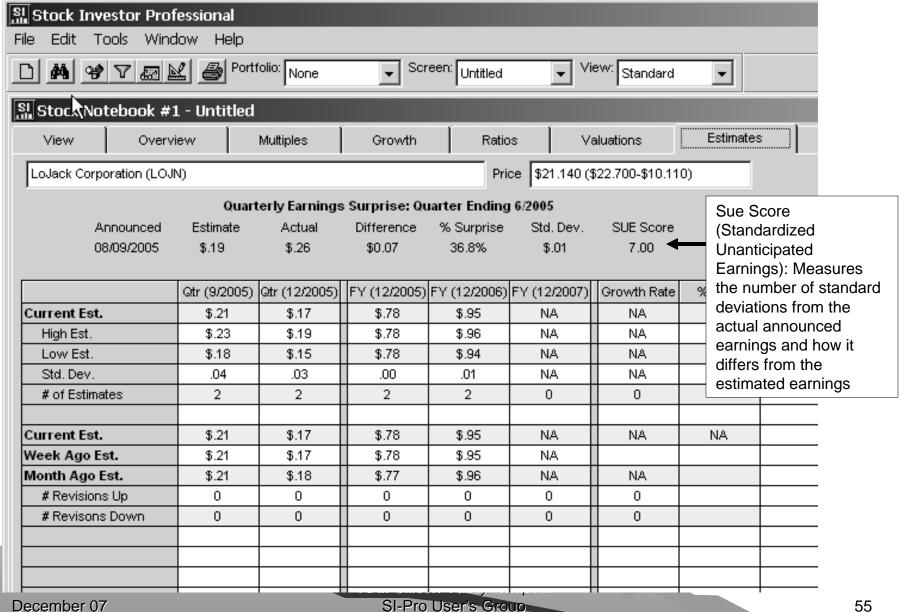

Ratios

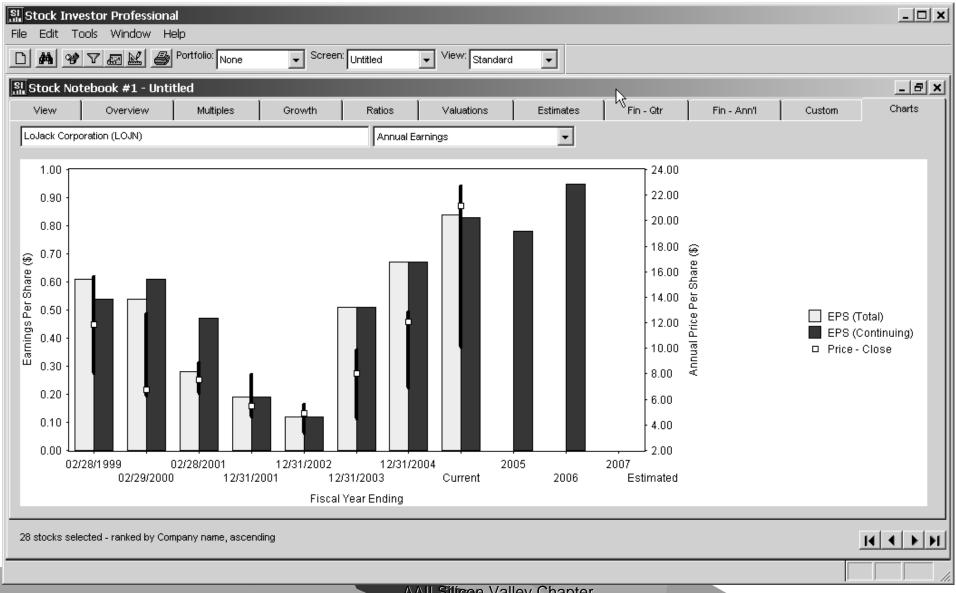

Estimates Tab

- Estimates are provided by I/B/E/S
- Earnings Surprise for past quarter
- Quarterly estimates given for the current and next quarter
 - Range for current estimate
 - Recent trend in estimates
- Annual estimates given for each of the next 3 years
- A long-term (5-year) growth rate in estimated earnings is also provided

Earnings Estimates

Annual Earnings and Prices

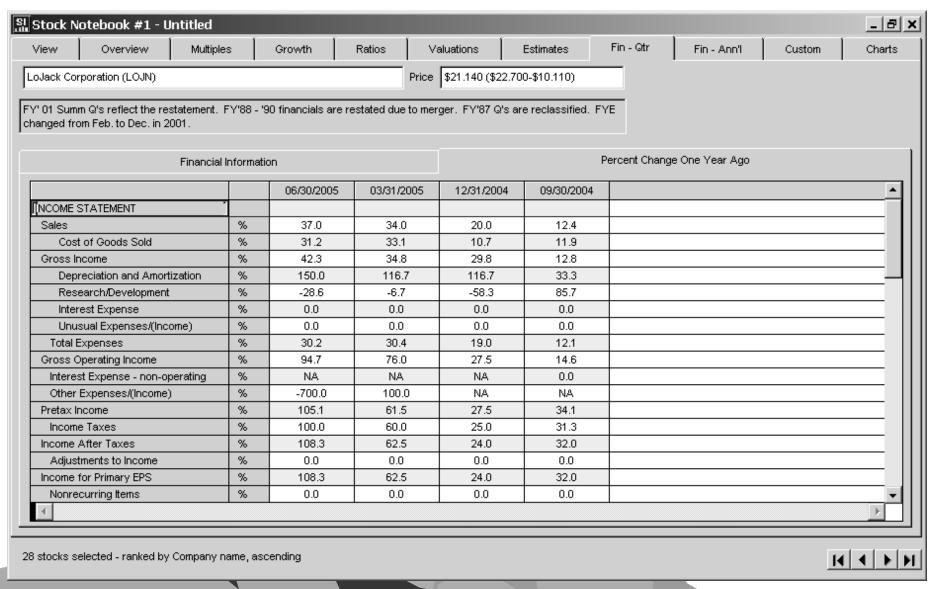

Quarterly Financials

- Selected Income Statement, Balance Sheet, and Statement of Cash Flow items for each of the last 8 fiscal quarters
- Where "Flash" results are also posted
 - Quarterly sales and EPS figures that have been announced but not yet filed
- Sub-tab shows the percent change in the financial data from quarter to quarter

De

Valuation

Valuations Tab

- Two common methods for valuations
 - Discounted cash flow:
 - Usually company-by-company
 - Based on the present value of future stream of earnings or dividends.
 - Not used in screening programs (formulas get too complex)
 - Best done elsewhere such as in a spreadsheet
 - Comparative:
 - Measures how cheap or expensive a company is to its peers. Common measures found in screening programs are:
 - Price/earnings
 - Dividends
 - Cash-flow
 - Free cash-flow
 - Sales

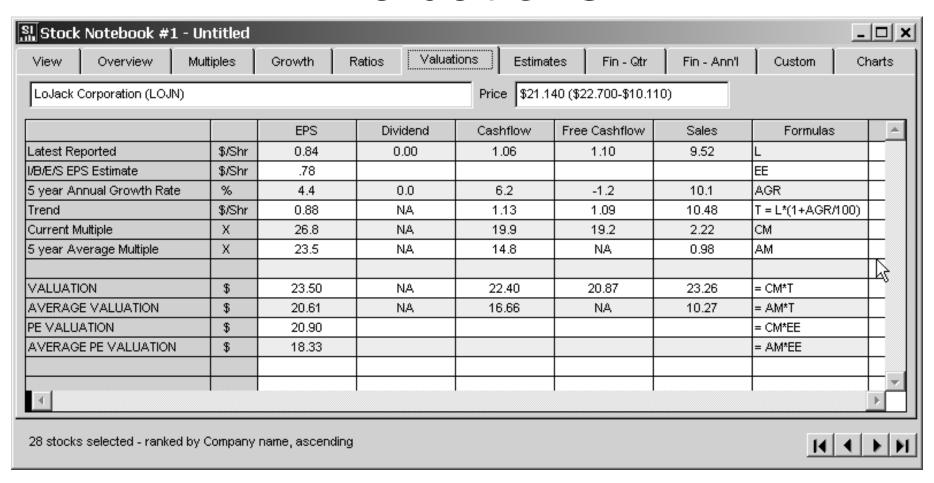

Using Valuations

- Valuations provide a quick feel as to whether the current price is fair relative to past valuation levels and growth rates
- Using the multiples, assumes trends in behavior will continue into the near future
- Using the 5-year average smoothes and normalizes the data

Valuations Tab (continued)

- 12-month price projections based on Price-Earnings Ratio, Dividends, Cash Flow and Free Cash Flow, and Sales
- SI-Pro finds the "trend" in the value by taking current value and extending it by its 5-year growth rate
- The trend value is multiplied by the current multiple (to find the valuation) or the 5-year average multiple (to find the average valuation)

Valuations

Custom Screening Strategies

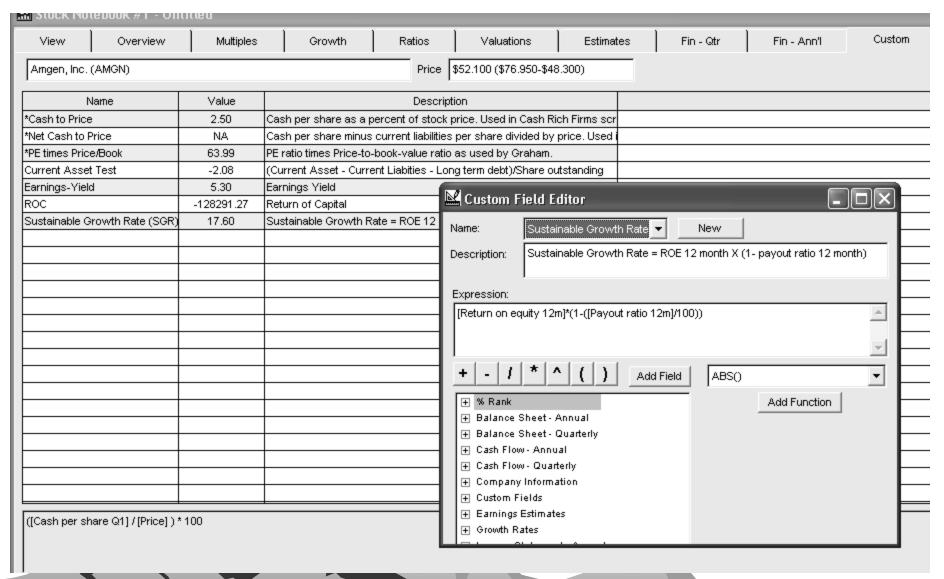

Custom Fields

- Custom fields can be used to create a new financial ratio, percent change, etc., by creating an algebraic formula that uses fields that already exist in the program
- Custom fields can be used in all program elements such as screens, views, other custom fields, etc.
- Limitations
 - 250 custom fields

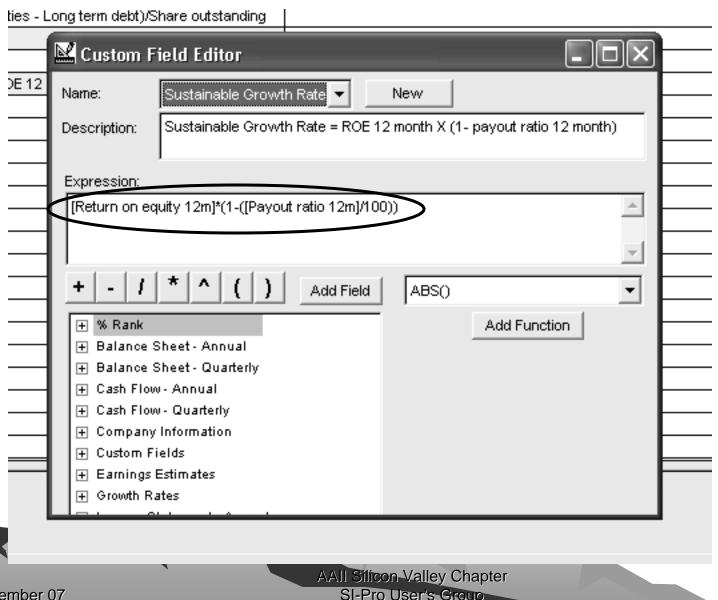

Sample Formula Sustainable Growth Rate (SGR)

- The maximum growth rate that a firm can sustain without having to increase financial leverage.
 - Calculated as:
 - ROE x (1 dividend-payout ratio)
- SGR: A measure of how much a firm can grow without borrowing more money. After the firm has passed this rate, it must borrow funds from another source to facilitate growth.

250 Custom Fields

Summary & Closing Comments

- Download the trial version and get familiar with the tabs
- Weekly updates for SI Pro users
- Start by using a pre-set screening strategies
 - There is wide range of strategies... chose one or two that are compatible with your investment goals
 - Remember: Pre-set screening strategies will often result in high turnover in the lists of stocks, so please do you due diligence
- Do your analysis!
 - Buying stocks solely on screening strategies is not recommended
- As you become familiar with SI-Pro, try developing some custom criteria
- Feel free to tinker!!

SI-Pro User's Group

- Exchange knowledge on how to use SIPro
- Meet on regular basis... once a quarter or more frequently if needed
- Moderated listserver, where group members exchange ideas and share files:
 - Subscribe: SV-SI-Pro-subscribe@yahoogroups.com
- Discuss new and innovative screens
- Presentation topics could include:
 - Review popular screens and the underlining criteria
 - How to modify screens to suit ones own needs
 - How to use the list of stocks for further analysis
 - Educate group members on how to use pre-defined screens
 - Invite guest speakers from other regional user groups or the national office to present how they are utilizing SIPro
 - Discussion techniques for back testing screens
 - Provide feedback to SIPro developers for future features
- User's group is open to AAII members and users of SIPro
